

Ki te tautoko i te iwi e noho ana ki te mate hinengaro ma'unimā ranei te whakatutuki putanga hauora me te mahi i runga i te whāinga hauora motuhake

To support people living with a mental illness achieve healthy outcomes and work on a specific physical health goal.

Comcare recognises the importance of the relationship between physical and mental health and has endorsed the Equally Well initiative which has been developed to improve the physical health outcomes for people with experience of mental health and/or addiction issues.

## Peer Health Coaching

Peer Health Coaching helps a client identify ways to improve their own health and wellbeing and provides short term coaching and support. Peer health coaches work with a person on a specific health related goal. Coaching activities promote successful outcomes through motivational interviewing and attention to strengths, needs and goals.

Receiving Peer Health Coaching to work through obstacles, identify support and information and provide motivation has helped participants to achieve their health goals. Clients feel more able to manage their health and have more confidence in maintaining healthy lifestyle changes after Peer Health Coaching.

## Peer Health Coaches

As well as being trained in using their lived experiences of recovery, Peer Health Coaches are also trained in coaching techniques which enable clients to find sustainable and meaningful strategies to achieve their physical health goals. They are passionate about the link between physical and mental health and understand the challenges of making lifestyle changes.

## Peer Health Coaching Outcomes

Our Peer Health Coaching has supported people to:

- Have dental work or eye checks completed.
- Have a full GP health check.
- Change their diet, such as reducing sugar or increasing fruit & vegetables.
- Join local gyms or increase their physical activity.

“It’s fantastic—when you know they’ve been there too. They understand everything. She’s very motivating. I feel great after I talk to her. She talks in a way I can understand. And it worked!” (Client)

“Completing a health prompt made me aware of what I needed to work on, and with the support of my peer health coach I went to get my eyes tested for the first time. When I received the bad news I was glad that she stayed with me to help me understand what it meant & what the options were.”
